

CORTADORA LASER PARA SUAJES CURVOS

MODELO: **PACKLASER-RC1000**

FEATURES

- 1.High rigidity machine bed with annealing process to make sure the accuracy of the machine, and to be stable for a long time;
- 2.Imported servo motor, reducer and other precision components to ensure the machine's cutting accuracy;
- 3.Optimize the mixed optical path, simplily operate, and even cutting slit;
- 4.Intelligent electronic follow-up laser head cutting system, adapt to the uneven materials automatically to ensure the same slit;
- 5.Strong smoke exhaust system, less smoke during working to get a good environment;
- 6.Freely design a variety of graphics or text instantly to be cut, it's simple and flexible;
- 7.Fast cutting speed, low operating costs, rapid return on investment.

Laser power: 1000W 1500W 2000W Optional

One set laser generator can be shared for rotary and flat die board laser cutting machine.

CORTADORA LASER PARA SUAJES CURVOS

MODELO: **PACKLASER-RC1000**

TECHNICAL PARAMETERS

MODEL RC1000 / RC1500 / RC2000

LASER POWER 1000W / 1500W / 2000W

CUTTING LENGHT 3000 MM

CUTTING DIAMETER Ø200-800 MM

POSITIONING ACCURACY ±0.1 MM

GRAPHIC FORMAT DXF, PLT, AL...ETC

LASER HEAD CONTROL AUTO FOCUSING

CUTTING THICKNESS 0.45 MM, 0.71 MM, 1.05 MM...ETC

MACHINE POWER SUPPLY 380 V, 50 HZ, 10 A

CONTROL SYSTEM MOVEMENT CONTROL CARD

MACHINE WEIGHT 4000 KG

OPERATING SIZE 760*650*1650 MM (L*W*H)

MACHINE OVERALL DIMENSION 7800*1600*2200 MM
